

## ENSURA™ Water LCMS

Liquid chromatography - mass spectrometry (LC-MS) is now an inseparable part in today's well-equipped analytical laboratory. Azytus ensures you to have consistent reliable analysis by using our high purity WATER (LCMS Grade) designed to meet the demanding requirements of LC-MS applications, ensuring baseline stability, lowest impurity levels and, in addition, high UV transmittance.

### Product Feature :

- LC-MS application tested for consistent quality according to the reserpine test
- Extremely low levels of inorganic and organic impurities
- Tested for Metallic impurities with stringent limits
- Batch to Batch consistency

Product Code	Product Name	Grade	Pack Size
11458-4LT	Water	LC-MS	4 Ltr.
